Books 5-7 introduce rational numbers and expressions. The math questions for grade 7 follow a stepwise learning process that helps students understand concepts better. Book 3 covers Percents and Decimals. Parents use the math worksheets on this website to give their children extra practice with essential math skills. Students develop understanding by solving equations and inequalities intuitively before formal solutions are introduced. Another option is to adjust the "scale" to 95% or 90% in the Print Preview. Later they do sophisticated constructions involving over a dozen steps and are prompted to form their own generalizations. They continue studying ratio and percent and learn about proportions. Books 8-10 extend coverage to the real number system. Book 2 covers Percents and Fractions. The flexibility and text book quality of the math worksheets, makes Math-Aids.Com a very unique resource for people wanting to create and use math worksheets. Students begin their study of algebra in Books 1-4 using only integers. Here is a non-intimidating way to prepare students for formal geometry.
